STRUCTURE DIAGRAM

MOTOR

■ Chinese top brand motor

■ Can be opened manually when power failure

We use exclusive motors for rolling doors, which can be used to open the door manually during a power outage, providing double protection.

BUTTON AND REMOTE

Opening methods include buttons and remote controls which can open the door remotely.

Wireless Wall Switch
Beautiful and easy to install

SAFETY DEVICE

Closure Detector

Photo Detector

Closure detector and photocell sensor serve as safety devices that can detect pedestrians passing by in time, providing safety guarantee for people when entering and exiting.

SLATS

■ Slat thickness: 0.4mm

■ Material:
Pre-colored steel

There are a variety of slates with different styles and functions to choose.

RAILS WITH SEAL

Equipped with sealing tracks fitted with sealing strips. Effectively blocks air, dust, and noise intrusion. Enhances sealing performance and indoor conditions, ideal for clean or noise-sensitive areas.

HOOD COVER BOX

The hood cover box is also made of pre-colored steel. The presence of the box can extend the service life of the motor.
