### STRUCTURE DIAGRAM

### MATERIAL

Powder Coated Galvanized Steel

304 Stainless Steel

According to the different materials, the clean door is divided into galvanized color steel and stainless steel two types.

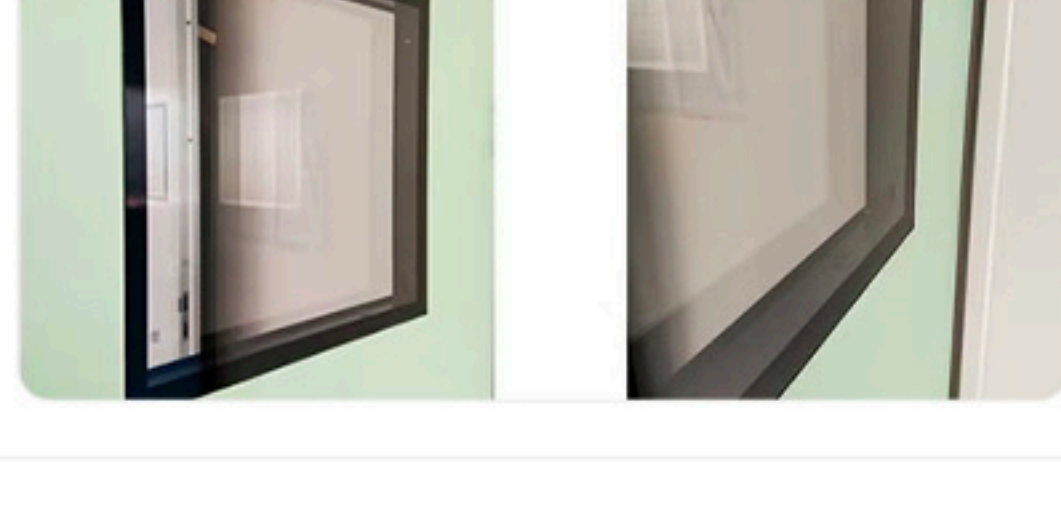

Galvanized color steel clean door has beautiful appearance and high cost performance, applicable to general clean area; stainless steel clean door has stronger corrosion resistance and structural strength, applicable to higher environmental requirements of medicine, food, electronics and other clean places.

Both door types can be equipped with windows, access control systems and sealing structures to meet the needs of different clean environments.

### WINDOW

Special double layer safety tempered glass , it is complete flush with the surface of door leaf, to avoid dusty accumulation and make it easy for cleaning ,inside is filled with silicagel desiccant, to avoid condensation of moisture and dew on the panel.

### AUTO LIFT SWEEPER BAR

The Auto Lift Sweeper Bar will automatically press down when the door is closed and fit closely to the floor, effectively eliminating the gap between the door leaf and the floor and preventing dust, pests or odors from entering the room.

When the door opens, the sweeper automatically rebounds and lifts up without affecting the operation of the door.

The design enhances the cleanliness effect and is especially suitable for areas with high environmental hygiene requirements, such as clean rooms, laboratories and food workshops.
